  - Home Repairs

# Kayenta Coal Mine

.(Mark Henle/The Republic)

# Firewood

# DIY Healthy Heating

# Contractor Training Workshops

# Aging In Place

# New Heating Stoves

# Ductless Heat Pumps

- Improved Indoor Air Quality
- Energy Efficient
- Low Maintenance
- High initial purchase and installation costs typically require an HVAC professional.
- As temperatures drop, the heat pump must work harder. Look for models with a Heating Seasonal Performance Factor of over 12.0 BTU/Wh.
- Multiple head units may be needed, depending on the size of the home and heating needs.
- Aesthetics and mounting issues
- Pannel and wiring updates

# Solar Air Furnaces

- Free source of heat
- Renewable energy
- Improve indoor air quality
- Supplemental heat source
- Help reduce heating bills
- Opportunity for local manufacturing

Hot Water Heaters

# Ramp Building

# Bathroom Upgrades
